

WHAT IS CLAIMED IS:

1. A multi-functional tool assembly for a processing tool of a waste processing machine comprising:

5 a tool holder for attachment to a rotor assembly of the waste processing machine; and

a multi-functional tool attached to said tool holder to reduce waste material and to aggressively output the reduced waste material from the rotor assembly of the waste
10 processing machine.

2. A multi-functional tool assembly as set forth in claim 1 wherein said multi-functional tool comprises a waste reducer and a fan disposed adjacent said waste reducer.
15

3. A multi-functional tool assembly as set forth in claim 2 wherein said fan has an axial width greater than said waste reducer.

20 4. A multi-functional tool assembly as set forth in claim 2 wherein said fan is located radially inward of said waste reducer.

5. A multi-functional tool assembly as set forth
25 in claim 2 wherein said waste reducer is a cutter made of a carbide material for cutting waste material.

6. A multi-functional tool assembly as set forth
in claim 2 wherein said fan is made of a metal material.

5 7. A multi-functional tool assembly as set in
claim 2 wherein said fan has a generally rectangular shape.

8. A multi-functional tool assembly as set forth
in claim 2 wherein said waste reducer is generally rectangular
10 in shape.

9. A multi-functional tool assembly as set forth
in claim 2 wherein said multi-functional tool comprises a head
and a shaft attached to the head.

15 10. A multi-functional tool assembly as set forth
in claim 9 wherein said waste reducer and said fan are
attached to said head opposite said shaft.

20 11. A multi-functional tool assembly as set forth
in claim 1 wherein said tool holder includes a pair of arms
extending radially and said multi-functional tool is attached
to one of said arms.

25 12. A processing tool for a waste processing
machine comprising:

09970060-100304

a tool holder for attachment to a rotor assembly of the waste processing machine; and

a single multi-functional tool attached to said tool holder to reduce waste material and to aggressively output the
5 reduced waste material from the rotor assembly of the waste processing machine.

13. A processing tool as set forth in claim 12 wherein said tool holder comprises a first arm extending
10 radially and a second arm extending radially and spaced from said first arm.

14. A processing tool as set forth in claim 13 wherein said multi-functional tool is attached to said first
15 arm.

15. A processing tool as set forth in claim 14 including a raker attached to said second arm.

20 16. A processing tool as set forth in claim 12 wherein said multi-functional tool comprises a waste reducer and a fan disposed adjacent said waste reducer.

17. A processing tool as set in claim 16 wherein
25 said fan has a width greater than said waste reducer.

09970060-100304

18. A processing tool as set forth in claim 16 wherein said fan is located radially inward of said waste reducer.

5 19. A processing tool as set forth in claim 16 wherein said waste reducer is a cutter made of a carbide material for cutting waste material.

20. A processing tool for a waste processing
10 machine comprising:

a tool holder for attachment to a rotor assembly of the waste processing machine, wherein said tool holder includes a first arm extending radially and a second arm extending radially and spaced from said first arm; and

15 a single multi-functional tool attached to either one of said first arm and said second arm of said tool holder having a cutter to reduce waste material and a fan disposed adjacent said cutter to aggressively output the reduced waste material from the rotor assembly of the waste processing
20 machine.
